

Efficient and versatile, the Orbiter 175 trommel is designed to handle a wide range of organic materials. Fully self-contained and highly productive, the Orbiter is easy to transport and operate.

Orbiter 175

- Cat 3.6 (130hp) Tier 4 engine (C4.4 LRC)
- 10' tracks for mobility and stability
- 40" wide heavy duty feed belt
- Over 300ft² of screening area
- Transportable without permit
- High capacity hydraulic cooler for efficient operation in tough environments
- 27,500lbs weight
- Easy-flow hopper design for efficient material flow
- Hydraulic support legs for stability
- Auto feed control with drum load sensor for accurate material processing.
